

# 12 WAYS TO RAISE YOUR PDI

## RUNNING AROUND

With 30 years of power distribution experience, we've now made the "perfect wave" even smarter.

PDI  is our way of raising a data center manager's Power Distribution Intelligence Quotient. It means within the PDI family of products, they'll seamlessly communicate key operation data on a single unit, over a cell of units, or an entire data center.

Whether installing (or retrofitting) one of our WaveStar™ PDUs, RPPs, Static Switches, Modular Racks, and every other manufacturer's units with our BCMS systems, you get one thing – immediate, accurate, real-time information about your mission-critical system.

Data will stream to an on-floor or centrally-located monitoring system, giving you immediate performance feedback to manage loads, current and other vital data to ensure the stability of your system.

New installation will benefit from smaller footprints and factory installed BCMS, easy-to-connect RPPs, and best-in-category PDUs and STS systems.

Existing systems can add BCMS on current PDUs or RPPs with our Split Core BCMS system: the J-Comm™ in-floor or cabinet top retrofit capability.

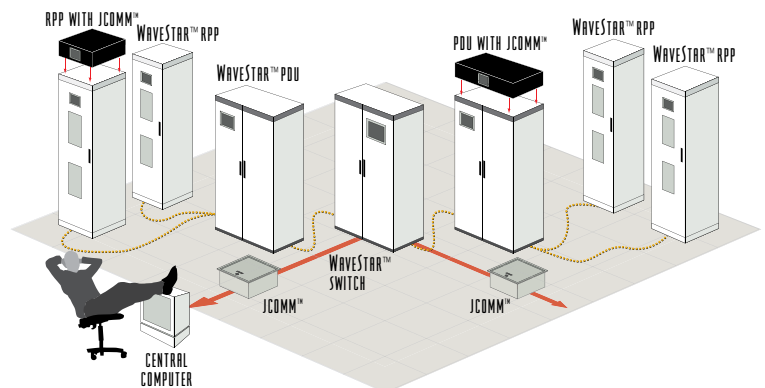

And if you have existing cabinets or need a system built to your specifications, you can install "plug-and-play" modules that include BCMS monitor, panelboard, and twist-lock receptacles.

creating the perfect wave

# NOW THERE ARE 12 WAYS TO RAISE YOUR PDI<sup>Q</sup>

(POWER DISTRIBUTION INTELLIGENCE QUOTIENT)

## 1 WAVESTAR<sup>TM</sup> PDU

### NEW MONITOR WHICH OFFERS

- All PDU points monitoring
- BCMS trending and monitoring
- kVA rating from 15-750 kVA

## 2 WAVESTAR<sup>TM</sup> RPP

- 225 or 400 amp configurations
- Factory installed BCMS
- Local and/or remote monitoring

## 3 WAVESTAR<sup>TM</sup> STATIC SWITCH

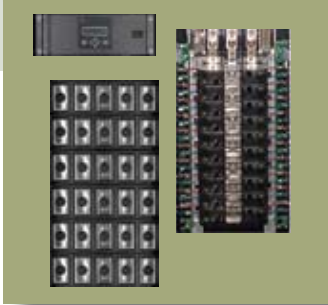

- Instantaneous wave form capture
- Triple redundant power supplies
- Serves as a hub for downstream BCMS devices

## 4, 5, 6 WAVESTAR<sup>TM</sup> J-COMM<sup>TM</sup>

- Underfloor and top hat to retrofit any shape, any manufacturer
- You install or we install

## 7 RACK DISTRIBUTION SYSTEM: MODULAR

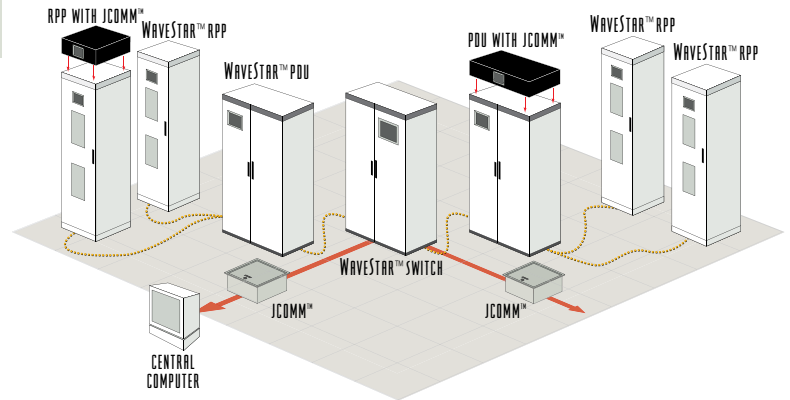

- Fits any 19" rack
- "Plug & Play" power integration
- 3 modules - BCMS with monitor, panelboard with CT strips, and twist-lock receptacle

## 8 RACK DISTRIBUTION SYSTEM: RPP

- Pre-wired in a 19" cabinet
- Custom made to your specifications
- Twist-lock receptacles
- BCMS local and remote

## 9 RACK DISTRIBUTION SYSTEM: PDU

- 15-150 kVA in a 19" rack
- Custom made to your specifications
- BCMS local and remote

## 10 SPLIT CORE BCMS

- Available for all manufacturer's panelboards and breakers
- Manages two panel boards
- Easy to install and connect to building management system

## 11 SOLID CORE BCMS

- Fits any existing installation
- Easy to install and connect to building management system
- Available for all manufacturer's panelboards

## 12 WAVESTAR<sup>TM</sup>

### BCMS LOCAL MONITOR

- Integrates all BCMS devices
- Load control from your desk
- Standard menu with reports
